Tallinn, Estonia

SUMMARY

Geospatial and remote sensing professional with 7+ years of experience working across environmental research, geospatial product development, and technical training. Skilled in Python-based automation, spatial data analysis, Google Earth Engine, QGIS plugin development, and large-scale satellite data processing workflows. Experienced in building analytical tools, automating geospatial pipelines, and supporting applied Earth observation projects involving environmental monitoring, land use analysis, and risk assessment.

EDUCATION

M.Sc. Geoinformatics

2016 – 2018

Bharati Vidyapeeth Institute of Environment Education and Research

Dissertation: Early Warning Forest Fire Detection System using RS and GIS (GPA: 8.11 / 10)

B.Sc. Mathematics (Hons.)

2013 – 2016

The Maharaja Sayajirao University of Baroda

EXPERIENCE

Training Associate

Spatial Thoughts LLP

↑ OCT 2022 – PRESENT 📍 REMOTE, INDIA\ESTONIA

- Developed and tested geospatial training workflows focused on Python, Google Earth Engine, GDAL, and QGIS.
- Built and automated spatial analysis workflows using Python and cloud-based geospatial platforms.
- Supported participants in debugging geospatial scripts, remote sensing workflows, and Earth observation analysis pipelines.
- Contributed to consultancy and R&D projects involving satellite imagery analysis.
- Created reusable analytical resources and technical documentation.

Software Engineer

Genesys International Corporation Ltd.

↑ OCT 2021 – SEP 2022 📍 MUMBAI, INDIA

- Developed Python-based tools and automation scripts within QGIS to streamline geospatial data processing.
- Automated spatial analysis and data validation tasks for large geospatial datasets.
- Improved efficiency of GIS operations by reducing manual intervention through custom scripting.
- Worked in a collaborative development environment supporting enterprise geospatial solutions.

Project Associate

CSIR – NEERI

↑ FEB 2019 – JUL 2021 📍 NAGPUR, INDIA

- Worked on GIS and remote sensing projects involving environmental monitoring and risk assessment.
- Contributed to development of 'RISK-PiNET,' a GIS-based risk assessment modelling tool.
- Performed satellite-image-based analysis including land-use/land-cover classification.
- Automated remote sensing and spatial data processing workflows using Python.

SKILLS

REMOTE SENSING & GIS TOOLS

QGIS

Google Earth Engine API

Remote Sensing

Spatial Analysis

Earth Observation

Satellite Image Processing

LULC Classification

PROGRAMMING SKILLS

Python

Pandas

NumPy

GeoPandas

Rasterio

GDAL

PostgreSQL/PostGIS

R

WORKSHOPS

Advanced PyQGIS Workshop

Conducted and contributed to technical workshop content focused on advanced PyQGIS workflows and automation.

DuckDB & Cloud-Native Geospatial Workshop

Developed workshop material focused on DuckDB, cloud-native geospatial workflows, and modern spatial data analysis techniques.

PROJECTS

FOREST FIRE EARLY WARNING SYSTEM

Developed a near real-time forest fire detection workflow using MODIS satellite data and automated hotspot detection.

QGIS AUTOMATION TOOLS

Built Python tools and scripts for automating spatial analysis and GIS workflows inside QGIS.

GOOGLE EARTH ENGINE APPLICATIONS

Developed cloud-based geospatial workflows using Google Earth Engine for Earth observation analysis.

STREAMLIT CERTIFICATION APP

Developed an internal certification application for assessment and certification processes.
